santiagogomezfpv@gmail.com

About me

I'm an electronic engineer with a passion for programming and frontend web development. As a junior frontend web developer, I'm committed to continuous improvement and innovative solutions. I'm an enthusiastic collaborator who values teamwork and is ready to take on new challenges in this exciting field.

On my GitHub repository, SantiagoGomezfpv, I showcase various useful repositories, notably 'ApiBirds' where I've developed an API using FastAPI to identify birds.
